## General risks

- The value of the funds and the income from them is not guaranteed and may fall as well as rise. You may get back less than you originally invested.
- Past performance is not a guide to future performance.
- You should note that your tax treatment in relation to any investments held outside an ISA will depend on your individual circumstances and may be subject to change in the future. Governments may change the tax rules which affect you or the funds in which you have invested.

## What are the risks specific to this fund?

- If a fund is a specialist country-specific or geographical region fund, the investment carries greater risk than a fund diversified across more countries.
- Funds investing in smaller companies may carry a higher degree of risk than funds investing in larger companies. The shares of smaller companies may be less liquid and their performance more volatile over shorter time periods.
- Certain funds hold a more concentrated portfolio than the average fund. Whilst this can increase the potential reward, the nature of these funds can increase risk. Returns may be volatile and will be impacted more by fluctuations in the value of underlying stock.
- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
